# Moodboard (3069)

HUD

Past World

IDEA:

The video is set in the year 3069 and the surrounding is all polluted and dirty with scraps on the floor and building part demolished or broken. No greenery present. The hero comes up and speaks to the camera or a friend behind the camera saying he recently studied about Trees or Plants. The friend responds by asking him what it is as he has never heard of such a thing ever before indicating greenery became extinct years ago. The hero raises his hands and there is a sort of futuristic ring/ bracelet present, and a HUD opens up where he points next to him, and a tree pops up on the HUD. He shows various trees like apple tree, Pine tree, etc and the hero extends his arms to the trees, and he sort of time jumps to the past where there was lot of trees, greenery etc. A message about deforestation or pollution pops up. Fades to black.
